EDUCATION

- SOFTWARE ENGINEERING /
BACHELOR'S DEGREE
Astana IT University, Astana
2023-2026

SKILLS

- Flutter, Dart
- MediaQuery, Provider, go.router, Dependency Injection
- Firebase Authentication, Cloud Firestore
- Git, Github
- HTML, CSS, JS, Node.JS (Express.JS)
- PostgreSQL, MongoDB

LANGUAGES

- English - B2
- Russian - C1
- Kazakh - C1

Alimzhan Gabit

Flutter Mobile Developer

PROFILE

Computer Science student specializing in mobile application development with Flutter and Dart.

Hands-on experience building cross-platform mobile apps with Firebase authentication, real-time databases, and clean UI architecture

EXPERIENCE

Member — Datathon DSC 2024

Astana IT University, 2024

- Participated in team-based development projects
- Collaborated on data-driven solutions ("Smart City", "binY")

PROJECTS

Flashcards Mobile App (Flutter)

Cross-platform mobile application for memorizing terms using spaced repetition

- Flutter (Dart) mobile application for Android
- Implemented Firebase Authentication
- Cloud Firestore for real-time data synchronization
- Designed responsive UI
- Managed project with Git and GitHub

Pomodoro timer mobile app (Flutter)

Cross-platform productivity application with work/break cycles, session tracking, and ambient metronome support

- Flutter (Dart) mobile application for Android
- Implemented Firebase Authentication (including Google Sign-In and anonymous flow)
- Integrated Firebase Realtime Database for syncing user minutes/progress
- Built timer engine with phase transitions (work/break), pause/continue, reset, and safe exit handling
- Added background metronome playback with mute/unmute controls synchronized to work sessions
- Designed responsive UI with keyboard-safe layout and fixed bottom action controls
- Managed project with Git and GitHub
